

Compatible with our sealers w/ dry ink coding

- Specialized foam rolls that are ideal for our dry ink continuous band sealers
- Colors available: black, white (blue, red, and yellow by special order)
- Widths available: 15mm and 30mm

## More Details:

Our Hot Melt Ink Rolls are specialized foam rolls that are friction loaded with a variety of hot melt inks for use in our dry ink continuous band sealers. Our ink rollers can perform from 248°F-302°F (120°C-150°C). We offer two different sizes, 15mm and 30mm, as well as five different colors: black, blue, red, white and yellow. Under normal operating conditions, a roll should provide approximately 50,000 but this will vary significantly by number of lines, characters of print, and temperature used during printing.

Our hot ink rollers do not contain any hazardous components required to be listed under the OSHA Hazard Communication Standard (29 CFR 1910.1200).

For use with our all our dry ink coding band sealer models (HL-M810, FRM-1010, FRM-1120C, HL-M1120LD)

## Specifications:
